Introduction

Sticky Agenda is a software for recording notes. It allows you to write notes and view them as small windows. It allows you, for each of these notes, to define the reminder time, export, synchronize your notes with the web. This software was made to run on multiple platforms, and it will permit you to always have your notes when moving from one computer to another. Sticky Agenda software is flexible in appearance to allow everyone to set the colors as desired.

This manual provides the information necessary for the handling of Sticky Agenda software. It describes:

- How to install and uninstall
- Creating notes
- Updating notes
- Removing notes
- Reminder management
- History
- Synchronization

Installing Sticky Agenda 1.4

Hardware compatibility

Sticky agenda was designed to be a lightweight application. Never the less some minimum requirements are expected:

RAM – 256 MB Minimum

Processor – 1 GHz Minimum

Hard disk – 5 GB minimum

The application works on PCs without restriction on the manufacturer.

Software Compatibility

Operating System

The application Sticky agenda is meant to be used on the following OS :

- Linux Distribution
- Mac OS
- Microsoft Windows

Software dependencies

L'application Sticky Agenda requiert pour son installation un autre logiciel disponible sur toutes les plates-formes appelées JRE pour JAVA RUNTIME ENGINE. Cette dépendance a été jugé essentiel lors de conception pour la permettre une exécution de l'application sur plusieurs plateformes.

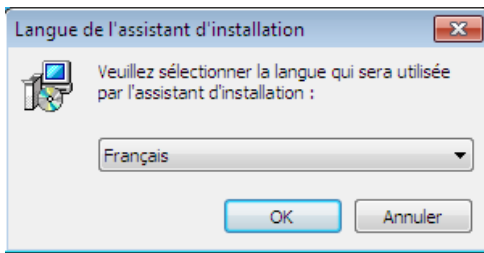

Sticky Agenda requires for its installation another software available on all platforms called JRE for JAVA RUNTIME ENGINE. This dependence was considered essential when designing in other to allow permit the software to run on multiple platforms
